'That Louth County Council develop and submit a proposal to the Dept of the Environment and Local Government for the re establishment of the County Architect's Office as envisaged in Government Policy on Architecture 2009 to 2015, Action 7.

In order to advance the quality of the designed environment, the Department of the Environment, Heritage and Local Government, in collaboration with the City and County Managers Association, will consider the benefits of each county/city council submitting plans for the provision of in-house architectural services, headed at the level of City or County Architect whose responsibilities may include:

- i. the promotion of architectural quality within the built environment;
- ii. specific engagement with infrastructure and public realm projects;
- iii. engagement with NGO and private sector activities in the promotion of architecture and architectural heritage, including exhibitions and publications and local awards schemes in order to promote architecture among the wider public.

The plans submitted will include the deployment of architects and other related professionals including architectural conservation officers to ensure that architectural conservation issues are proactively addressed. This may also include proposals to regionalise specific expertise in creating efficiencies given the current economic difficulties and limited resources available
