To whom it may concern,

I am writing to you in relation to the Draft Louth county Development 2021-2027 after reviewing the documents and the significant area on the Cooley peninsula that is earmarked for Zone 1

The draft has not taken into consideration those who would want to remain where they come from who are not necessarily landowners or come from bigger families. The plan is fundamentally to push people out of their local area and into towns with exorbitant house prices and poor infrastructure.

The option for me to return home to where I am from and where my family is from is fundamentally being taken away from me as houses don't come up for sale and the limit on building on family land, This is quite bias towards older members of families as they naturally build first. Why am I being punished for having to move away to get a job? Will I not be able to move home with my family when my parents grow older and look after them?

There seems to be a lack of common sense in relation to the rules and a copy and paste has been completed based on other draft documents from other counties

Regards

Miceal O'Neill
