To Whom it May Concern

I wish to complain about the implementation of the proposed planning changes per the above which would greatly impact local people building in their local area. I am from Greenore and currently live in North Wales over the next few years I want to return to live in my home area and build my own house. But due to planning given already for a new port in greenore I can't even build near my home house but now to be stopped from building anywhere in Cooley is an absolute disgrace. I do not come from a rich farming family I have to buy my own site therefore these new rules would completely prevent me from being able to move back home. What about future generations that will be forced to live in towns or move abroad because their own council is preventing them from building in their home area. Not everyone was born into privilege and owns hectares of land some of us were given nothing but a good education to help us build a life. I feel this is discrimination against the less privileged in life. This proposal definitely requires further discussion on a much wider basis and should not be shoved through without full discussion during a time of a global pandemic and Brexit looming.

Please take this as petition against the proposed.

Kind Regards

Olivia Beckett
