To whom it may concern,

I am writing this email in regards to the development plan for in the cooley peninsula.

I find the plan to be very negative especially for people who grew up and have spent all of their life in the area. My entire family along with friends live in the area.

My hopes for the future are to build in the peninsula with my own family. How can it only be allowed for full time agricultural workers? I work full time to support my family and just because it is not in this sector I am told I cannot build my home there ?

I would seriously recommend that you reconsider your plan and the devastating effects it will have on the community.

I patiently await your reply
