To whom it may concern,

I Shane Mulligan born and bred in Omeath strongly object to the louth development plan 2021 - 2027. The thought of telling one of our children that they cannot build their family home on the family farm scares both myself and my wife.

All of our children love the country life, the fresh air, the freedom, the safety and the closeness of family. This would all change for the worst. Our children have a great family network in very close proximity. They can travel to all the houses with having to go into a main road.

Also the community would suffer detrimentally with the loss of students for schools leading to loss of teachers (jobs). The local football club would struggle to survive.

Driving people to larger town cramped in like cattle in a mart will also see a rise in crime rates and drug use. The Garda are already under pressure.

I plead with you to change this decision for the reasons above. Keep families together in their own community.
