To Whom It May Concern

I am writing this email to highlight my concerns in relation to the proposed County Development Plan 2021-2027.

From reading the draft I find that the qualifying criteria for Zone 1 and Zone 2 to be discriminating and cannot understand as to why someone who does not meet these criteria or is from outside the area should be prohibited from applying for permission to build a home.

It is stated that the purpose of the core strategy is to set out an evidence based strategy for the future development of the county, but if these new criteria are implemented it would drastically restrict the development of the areas in said zones and ultimately leave these areas to become isolated and for locals to emigrate out of the area.

I ask the council to reconsider these proposals. Once a person is willing to comply with the environmental regulations required, we should be allowed to build a home within our own county and continue to help our local communities and economies.

Kind regards
David Yore
