

Draft Louth County Development Plan 2021-2027

To whom it may concern,

I am sending this submission to express my concern for the draft development plan.

People, like me, have lived in the area all our lives and are now going to be displaced. I think it is unfair that this is going ahead during COVID 19 when the people who will be directly impacted by this won't be able to meet.

- Have you looked at the consequences of an aging population with no family carers living nearby?
- How can individuals afford to purchase homes in the local area? The cost of homes is going to skyrocket. It's going to be strangers moving in, not people from the local area who have been involved in the community since they were children.
- Where are the children going to come from to fill our schools? The numbers in our schools will drop leading to teachers losing work
- There will be an impact on communities and clubs with an aging population and no young families being able to build
- There is also going to be an impact on families around who from the family will get to build and lead to serious family disputes

Kind regards,
Eimhear
