

Draft Louth County Development Plan 2021-2027

To whom it may concern,

I strongly object to the Draft Louth Development Plan 2021-2027 that Louth County Council want to implement in 2021.

As a mother of a child with special needs, I feel very strongly about the proposed changes in the development plan. I cannot understand that my son with special needs in zone 1 would be treated any different than a special needs child in zone 2. I would question why he is less important. The support in our local community from family, friends', neighbours and local clubs played a vital role in him reaching his full potential. He will always need support and I would hope as a mother that he would be able to have all his siblings close by.

People who are born and reared in the community should be able to build where they were born and their families live. I feel a social study should be conducted to see what the impact of such a development plan would have on our people and our community.

Also, due to Covid 19, I am of the opinion that this draft plan should be postponed so as it needs to be discussed properly by the community.

Kind Regards,

Briege O Reilly.
