Subject: County louth rural housing.

22 12 2020.

I wish to make a submission in favour of people who live in the country area of county louth looking for permission to build their own dwellings on their own land now and into the future.

I own land beside me and I have grown up children who would like to build beside their parents in the near future.

They have been looking forward to this for many years now.they were reared here and this is their strong wish.

They would not like to live in a built up area.

Along our road and in our area we have a great water scheme forty kilometers in length with good potable drinking water with seven hundred houses on it and Room for as many more.

This is running since 1992.

When the new north cross route roadway is installed north of drogheda this will take most of the traffic off our road and leave it much quieter, here's hoping you find in favour of my correspondence.

Yours in truth.

Aidan McQuillan.
