> Please delay the implementing of this plan. Please wait until proper discussion has been held with the communities and not rushes through with the idea during Covid when communities can not come together to discuss. It is not appropriate to make such a decision at these hard and trying times, where proper consideration has been met. I am speaking for myself and those of my generation Please please acknowledge receipt if this and don't rush such an important matter. It's the lives of myself and my generation that have to be met with this, be met with refusal to live in the land that we were brought up. Please hold of on this!

> Thank you .
