Dear Sirs / Madam

I want to object the proposals set out in the above Development Plan prohibiting the one off housing in many rural locations.

I have been living in a rural setting for 40 years, built a house on my father's land and hope that if desired, that my daughters will have the opportunity to do the same in the future. I think that every landowner should be able to sell sites if he wants to anyone, especially to his family.

If this is not allowed the rural community will suffer. If the future generation have to move to urban areas, what will happen to the local schools, churches, community groups, clubs, businesses etc? It has taken years to grow and develop these organisations. I suppose it will be the developers that will profit, throw up a load of bad quality houses, charge excessive prices and laugh all the way to the bank!

We are in the middle of a Pandemic and I find it a disgrace that this Plan is being proposed in a time where people have so much on their minds people are dying and some are losing their jobs. We cannot get together to oppose these proposals - meetings - rallies are not allowed.

I had hoped that my daughter would be living beside me, that the grandchildren would be popping in to see me - with this Development Plan - these hopes are all but a dream! Community spirit and wellness are not being considered in these proposals.

I am very disappointed in the Local County Council Forward Planning Department.

Kind Regards

Mary Fischer
