To whom it may concern,

I would like to make a submission against the proposed county development plan which will affect families, communities, parishes and a proud cultures in county Louth as we know it.

I feel that if this plan was to be approved it would have a serious and lasting negative impact on rural communities and lead to population decline of younger families, which will lead to the loss of teachers in our schools, our local football clubs and lead to a loss of community spirit.

I feel that this plan will also negativitly impact local buisness who are already struggling and lead to the further loss of vital services such as post office, credit unions and Garda stations, all of which have seen closures in recent years.

The loss of population will also impact the ability to provide sustainable transport for existing community. I also feel that there is a lack of alternative affordable housing for locals who are priced out of local market by outsiders.

The plan at the very least should be delayed until the pandemic subsides so that people are able to meet in person to discuss the proposals.

Yours Sincerely,
Aoife Quigley
