

## Energy Policy

### Louth County Council:

- Is committed to the efficient use of energy across its facilities and functions, as appropriate to the nature and scale of the organisation's energy use and consumption.
- Aims to continually improve its energy performance across the organisation by the establishment of objectives and targets for continuous energy performance improvement with ongoing monitoring of this progress.
- Will ensure compliance with all applicable legal and other requirements to which it subscribes relating to its energy use, consumption and efficiency, and in achieving energy targets set out in the National Energy Efficiency Action Plan.
- Supports the procurement of energy efficient products and services, and promotes energy efficient design and construction in the built environment.
- Aspires to preserve natural resources, reduce greenhouse gas emissions and mitigate the effects of climate change.
- Senior Management will provide leadership and promote continual improvement in energy performance. Necessary resources and information will be made available to achieve objectives and targets.
- This Energy Policy, along with the organisation's energy usage, will be documented and communicated at all levels across the organisation and to relevant stakeholders. Updates and regular reviews will be undertaken as necessary.
