4.0 (a)EIAR

EIA Screening and Determination Council Directive 85/337/EEC (as amended) on the assessment of the effects of certain public and private projects on the environment (the EIA Directive') is designed to ensure that projects likely to have significant effects on the environment are subject to a comprehensive assessment of their environmental effects prior to development consent being given. The latest amendments to the EIA Directive are provided under Directive 2014/52/EU and Circular letter PL 1/2017.

Based on information provided and having considered the minor nature, size and location of the development, there is no real likelihood of significant effects on the environment and as such as EIAR is not required.

(b)Appropriate Assessment

Article 6(3) of Council Directive 92/43/EEC (as amended) on the conservation of natural habitats and of wild fauna and flora ('the Habitats Directive') requires that any plan or project that is not directly connected with or necessary to the management of the Natura 2000 site concerned but is likely to have a significant effect on it, on its own or in combination with other plans and projects, is to be authorised only if it will not adversely affect the integrity of that site.

The Planning Authority's Screening for Appropriate Assessment has considered the potential effects including direct, indirect and in-combination effects of the proposed development, individually or in combination with the permitted developments and cumulatively with other plans or projects on European Sites.

The nearest designated European Site is North-west Irish Sea SPA which lies 1.2km east of the site. On the basis that the existing dwelling is within a semi-urban environment and given the nature and scale of the proposed development, I am satisfied that it will not have an impact on any European site by reason of noise, emissions, lighting and human activity/disturbance.

Therefore, it is reasonable to conclude that on the basis of the information on the file, which I consider adequate, to issue a screening determination, that the proposed development, individually or in combination with other plans or projects would not be likely to have a significant effect on any European Sites, in view of the site's conservation objectives and a stage 2 AA is not therefore required.
